

## **Gender Responsive Health System and Services Legacy**

### *Legacy on Action Area #1*

---

Commit to long-term and sustainable increased investment in gender responsive health systems and services to:

1. Combat discrimination against vulnerable, marginalized, or disadvantaged populations--both in Canada and globally-- to guarantee equal access to services and quality care;
2. Fill critical gaps in the availability of high-quality health services (including SRHR) and evidence-based education/awareness programs in order to uphold women's and marginalized populations' rights;
3. Accelerate women's health research and development of new, affordable health interventions;
4. Increase leadership of women in the global health sector.
